MANAGED BOND FUND - Z ACC GBP

ISIN: GB00BRTM3L73
Share Class Price: 0.7427
Historic Yield: 1.2%
Ongoing Charges (OCF): 0.64% (as at 15/11/20)
ISA: Yes
Performance Fee: No

The ongoing charges figure (OCF) is usually based on the last year's expenses and may vary from year to year. It includes charges such as the fund's annual management charge, registration fee, custody fees and distribution cost but excludes the costs of buying or selling assets for the fund (unless these assets are shares of another fund). For a more detailed breakdown please visit www.columbiathreadneedle.com/fees. In some cases, the ongoing charges figure may be based on an estimate of future charges, either because the share/unit class is relatively new and has an insufficient track record to be calculated exactly, or if historic figures are unlikely to accurately reflect future ongoing costs.
Please see table of Share Classes available.

Risks

- The value of investments can fall as well as rise and investors might not get back the sum originally invested.
- Where investments are in assets that are denominated in multiple currencies, or currencies other than your own, changes in exchange rates may affect the value of the investments.
- As this Fund invests into other funds you should consider the underlying investments and overall risks.
- The Fund invests in securities whose value would be significantly affected if the issuer refused, was unable to or was perceived to be unable to pay.
- Changes in interest rates are likely to affect the Fund's value. In general, as interest rates rise, the price of a fixed rate bond will fall, and vice versa.
- The Fund may invest in derivatives with the aim of reducing risk or minimising the cost of transactions. Such derivative transactions may benefit or negatively affect the performance of the Fund. The Manager does not intend that such use of derivatives will affect the overall risk profile of the Fund.
- As the Fund is dual priced, there is a price to buy units and a different price to sell them. The price at which you deal may change depending on whether the Fund is experiencing inflows or outflows of cash, and any change will mean an increase or decrease in the price at which you deal.

Opportunities

- Provides access to the most cautious, risk averse fund within our managed range typically made up of lower risk bond funds.
- Benefits from access to the range of our funds from which the managers construct the portfolio.
- Greater diversification than traditional investment funds as it can access a range of regional investment strategies all managed by us.
- Benefits from our extensive multi-asset management experience that dates back to the inception of the business in 1994.
- Highly experienced asset allocation team that has expertise across all major asset classes.

Risk and Reward Profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time, and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table shows the Fund's ranking on the Risk and Reward Indicator. The lowest category does not mean a risk-free investment.

Fund Objective & Policy

The Fund aims to provide income with potential for long term capital growth. It looks to outperform a composite index over rolling 3-year periods, after the deduction of charges. This composite index comprises:

- 56% Bloomberg Barclays Global Aggregate ex GBP (GBP Hedged) Index;
- 24% Bloomberg Barclays Sterling Aggregate Index;
- 10% MSCI ACWI ex UK Index;
- 5% FTSE All-Share Index; and
- 5% Sterling Overnight Index Average (SONIA)

The Fund is actively managed, and invests at least 80% of its assets in other funds.

The Fund usually invests in other Threadneedle funds, however, funds managed by companies outside the Threadneedle group may also be held, when this is considered appropriate. These funds may invest worldwide.

The Fund focuses on investment in funds providing exposure to bonds (including corporate and government bonds), and to a lesser extent, funds investing in equities (company shares).

The balance of the exposure between these different asset types may vary over time, however, equity exposure will usually not exceed 20% of the Fund's value, under normal market conditions.

The Fund may also hold money market instruments, deposits, cash, and near cash.

Derivatives may be used with the aim of reducing risk or managing the Fund more efficiently, and up to 20% of the value of the Fund may be invested in funds that use derivatives for investment purposes. Derivatives are sophisticated investment instruments linked to the rise and fall of the price of other assets.

The composite index is representative of the Fund's investment exposure, and provides a suitably weighted target benchmark of global investment grade bonds (hedged to sterling), investment grade sterling-denominated bonds, global equities (excluding the UK), UK equities, and cash, against which Fund performance will be evaluated over time.

The figures refer to simulated past performance and are not a reliable indicator of future performance. The performance data does not take account of the commissions and costs incurred on the issue and redemption of units. The value of investments and any income is not guaranteed and can go down as well as up and may be affected by exchange rate fluctuations. This means that an investor may not get back the amount invested. Index returns assume reinvestment of dividends and capital gains and unlike fund returns do not reflect fees or expenses. The index is unmanaged and cannot be invested directly. All returns assume income is reinvested for a local taxpayer, bid to bid performance (which means performance does not include the effect of any initial charges). This share class has performance data calculated prior to the inception date, 16 December 2014. This is based upon a simulated/extended track record, using the track record of Threadneedle Managed Bond Fund RA Accumulation Shares (GBP) (ISIN:GB0032010042), and is in accordance with Morningstar's Extended Performance Methodology paper. The Morningstar Categories for funds in the Europe/Asia/Africa universe include funds domiciled in Europe and/or traded on European Markets. Morningstar regularly reviews the category structure and the funds within each category to ensure that the system meets the needs of investors and keeps pace with market developments. The performance shown includes Open End Funds and Exchange Traded Funds only and is filtered by Primary Share Class in Morningstar UK Registered Funds Classification.
