Investment Management

INVESTMENT OBJECTIVE

The objective of the fund is to achieve long term capital growth (at least 5 years) through investing in the shares of companies in emerging markets and also on exchanges in emerging markets.

INVESTMENT PROCESS

As their names suggest, each fund within the Equity Value range has been designed, and is managed, to meet differing investment aspirations based upon an investor's geographic preference.

The fund uses a systematic investment process to identify profitable and growing companies which are assessed as trading below their intrinsic value.

WHAT YOU NEED TO CONSIDER

Prior to investing, you need to consider the level of risk you are prepared to take, how much growth you want to achieve, and over what time period. If you have a long time to grow your investments you might be able to ride out market ups and downs better than someone who needs their money in just 5 years. You should regularly reassess the suitability of your investments to ensure that they continue to meet your investment goals and suit your time horizon. You should be aware that there can be no guarantees. The value of investments may go up and down and you may get back less than you invested originally.

TARGET MARKET

7IM Emerging Markets Equity Value Fund may be suitable for those investors seeking to achieve long-term capital growth through investing predominantly in a portfolio of equities of companies that are incorporated in, have their head office in and/or are domiciled in Emerging Markets and/or have a significant part of their operations in Emerging Markets.

REFERENCE BENCHMARK

The MSCI Emerging Markets Index may therefore be used as a means of judging the effectiveness of the fund's performance and strategy over the long term. The Manager maintains a high degree of flexibility, having the ability to invest outside the Index, in significantly fewer assets than those which constitute the Index and in weightings that are different. Investors should be aware that the fund does not seek to track that Index.
