R CLASS | GBP | ACCUMULATION **AS AT 30 JUNE 2019** 

**EQUITIES** 

**FIXED INCOME** 

**MULTI-ASSET** 

**ALTERNATIVES** 

### **FUND OBJECTIVE**

The Fund aims to achieve an annual return of 5% above the UK rate of inflation over the medium term through a combination of the returns on income and capital by gaining exposure to a range of asset classes. Notwithstanding the fact that the Fund aims to achieve an "annual" return over rolling 5 year periods, any capital is in fact at risk and there is no guarantee that such return will be guaranteed over that time period or within another time period.

PAUL CRAIG & QI INVESTMENT TFAM

### **RISK FACTORS**

Investment risk - the performance aim is not a guarantee, may not be achieved and a capital loss may occur. Funds which have a higher performance aim generally take more risk to achieve this and so have a greater potential for the returns to be significantly different than expected.

Strategy risk - as the Fund invests in other collective investment schemes, which themselves invest in assets such as bonds, company shares, cash and currencies, it will be subject to the collective risks of these other funds. This may include emerging markets risk and sub-investment grade credit risk.

Emerging markets risk - less developed countries may face more political, economic or structural challenges than developed countries.

Credit risk - the issuer of a bond or a similar investment within the Fund may not pay income or repay capital to the Fund when due. Bonds which are rated below investment grade are considered to have a higher risk exposure with respect to meeting their payment obligations.

Interest rate risk - investments in bonds are affected by interest rates and inflation trends which may affect the value of the Fund.

Liquidity risk - some investments may become hard to value or sell at a desired time and price. In extreme circumstances this may affect the Fund's ability to meet redemption requests upon demand.

Currency risk - the Fund can be exposed to different currencies. The value of your shares may rise and fall as a result of exchange rate movements.

**Derivative risk** - the Fund uses derivatives to generate returns and/or to reduce costs and the overall risk of the Fund. Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative investment. Derivatives also involve counterparty risk where the institutions acting as counterparty to derivatives may not meet their contractual obligations.

Capital erosion risk - the Fund takes its charges from the capital of the Fund. Investors should be aware that there is potential for capital erosion if insufficient capital growth is achieved by the Fund to cover the charges. Capital erosion may have the effect of reducing the level of income generated.

For a more detailed explanation of risks, please refer to the "Risk Factors" section of the prospectus.

### OTHER INFORMATION

Past performance is not a guide to future performance and may not be repeated. Investment involves risk. The value of investments and the income from them may go down as well as up and investors may not get back the amount originally invested. Because of this, an investor is not certain to make a profit on an investment and may lose money. Exchange rate changes may cause the value of overseas investments to rise or fall.

• The Fund invests principally in other collective investment schemes.

Your attention is drawn to the stated investment policy which is set out in the Fund's prospectus.

With effect from May 2019, Paul Craig became portfolio manager of the range, supported by the Quilter Investors investment team.

This communication is issued by Quilter Investors Limited ("Quilter Investors"), Millennium Bridge House, 2 Lambeth Hill, London, England, EC4V 4AJ. Quilter Investors is registered in England and Wales (number: 04227837) and is authorised and regulated by the Financial Conduct Authority (FRN: 208543). The Quilter Investors Generation CPI+ 5 Portfolio (the "Fund") is managed by Quilter Investors and is authorised by the Financial Conduct Authority as a non-UCITS retail scheme which can be distributed to the public in the United Kingdom. On 29 June 2018, the Old Mutual Generation Target 5 changed its name to the Quilter Investors Generation CPI+ 5 Portfolio. Quilter Investors uses all reasonable skill and care in compiling the information in this communication which is accurate only on the date of this communication. You should not rely upon the information in this communication. Nothing in this communication constitutes advice or personal recommendation. An investor should read the Key Investor Information Document(s) ("KIID") before investing in the Fund. The KIID and the prospectus can be obtained from www.quilterinvestors.com in English and other required languages.

The historic yield reflects distributions paid or declared over the past twelve months as a percentage of the mid market share price as at the date shown. It does not include any initial charge and investors may be subject to tax on their distributions. Please remember that yield figures are as at the last day of the month and may go down as well as up. The yield may fluctuate significantly during times of extreme market volatility. Our structure allows us access to the skills of managers in the institutional or corporate market as well as access to managers who are already available to individual investors through retail funds. Managers that we select in the institutional market are asked to manage a mandate (essentially this is simply a written agreement between us on how we want our investment to be managed on our behalf) – this allows us to control the investment boundaries, including the types of investment and the level of risk we want the manager to take. By tailoring the mandate we can also get each manager to focus on the areas where we think they are most skilled - giving them the best chance to outperform. These mandates may be held as Quilter Investors funds.
