Expenses can include costs paid by Aegon to third parties. The fund charges may differ for Retireadly (RR) or Aegon One Retirement (AOR).

## About fund performance

Investors should always consider performance in relation to the objective of the fund and over periods of at least five years. If a fund has risen in value, it doesn't mean it is meeting its objective – especially if the fund is aiming to outperform a particular benchmark or meet a risk target. The same applies if the fund has fallen in value.

## Our risk rating

**Above-average risk**

Above average risk funds typically invest in one single investment type or geographical region, for example regional equities (shares) or global bonds. This means that investors are completely exposed to the performance of that single investment type or region. These funds could experience lengthy periods where their value goes down depending on market conditions. However, these funds can also rise in value quite significantly and have historically provided good long-term growth. Because of their narrow investment focus, they're better suited to investors with at least five years to invest and to use in combination with other funds as part of a diversified portfolio.

## Fund objective

This fund uses a two-stage investment process. In the early years (growth stage), it aims to provide long-term capital growth by investing in a mix of investment types (shares, bonds, cash) appropriate to someone with a higher attitude to risk. Five years before the start of your retirement year, it aims to reduce risk by automatically transferring into lower-risk investments (risk reduction stage). There's still a risk your fund value could fall during and at the end of this stage. It assumes you won't want to take your full tax-free cash entitlement. If you don't take your benefits, you'll automatically be switched into the Scottish Equitable Sequel Growth Journey Retirement fund. Sequel Investments Limited (SIL) is a professional investment advisory firm, owned by Foster Denovo Group. SIL provides the asset allocation model and oversight for all the Sequel funds, for which they receive a fee, paid from the funds' annual management charge. The fee depends in part on how much money is in these funds.

## Fund performance

The following graph and tables show the performance of the fund over various time periods compared to the fund's benchmark (if there is one). All performance information is as at 31 Dec 2023 unless otherwise stated.

In the graph, performance is shown since launch if the fund is less than five years old.

## Fund manager information

This fund is an Aegon Solution. This means it is a pre-built fund Aegon have created to offer whole investment strategies in a single fund with the aim of making investing easier. We reserve the right to add, remove and replace the underlying funds within this solution with the aim of making sure the fund continues to meet its aims and objectives. Sometimes we work with external fund managers and they select and manage the underlying funds on our behalf. The additional charges/expenses may change when underlying funds are replaced, added or removed from the portfolio or when weightings between the underlying funds are changed. Please note, there's no guarantee the fund will meet its objective.

## Risks specific to this fund

There is no guarantee the fund will meet its objective. The value of an investment can fall as well as rise and investors could get back less than they originally invested. All funds carry a level of risk and the information below outlines the key risks for this fund.

---

**Currency risk** - this fund invests overseas so its value will go up and down in line with changes in currency exchange rates. This could be good for the fund or bad, particularly if exchange rates are volatile.

---

**Annuity target risk** - this strategy is aimed at those who want greater certainty about the size of annuity (guaranteed income) they can buy at retirement. However, by moving into long gilts and cash, you may miss out on the higher returns you might have benefited from if you'd stayed in your growth fund.

---

**Post retirement risk (Annuity target)** - if you don't buy an annuity on your retirement date, you'll remain invested 75% in long-dated bonds (government bonds only or a mix of government and corporate bonds) and 25% in cash until you tell us what you want to do. This mix isn't designed for long-term investing and returns may not keep pace with inflation, meaning the real value of your fund may fall.

---

**Third party risk** - in the event that the underlying investments which the fund invests in suspend trading, Aegon may defer trading and/or payment to investors. The value ultimately payable will depend on the amount Aegon receives or expects to receive from the underlying investments.

---

**Country/region risk** - this fund invests in a region that's particularly risky due to the lack of company regulation, political instability or war, for example. This means that its value will fluctuate more than funds invested in more developed countries or regions.

---

**Lifestyle performance information** - this factsheet contains information and performance for the 'Growth stage' of the lifestyle fund. The information and performance for your fund will be different if you're within the 'Retirement target / lifestyle stage', which normally starts seven years before your selected retirement date.
