## Advanced Passive Portfolios

The Advanced Passive Portfolios (APP) are a simple way for investors to have their investments managed by our experts and are available to clients with a minimum investment of just £1,000.

There are five funds aimed at different risk tolerances, ranging from Cautious to Aggressive Growth. Each portfolio invests in six asset classes – equities, bonds, real assets including commercial property, absolute return funds, commodities and cash. The blend between them is determined by our Asset Allocation Committee, which is made up of a senior team of investment professionals and chaired by our Chief Investment Officer, Chris Godding.

The portfolios are dynamically managed to ensure they meet the ever-changing investment environment and stay in line with their objectives and risk level.

The central investment team currently manages more than £9 billion of client assets invested in a range of portfolios.

## Investment Objectives of the Fund

The APP Growth fund aims to deliver a real return, ahead of cash over the long term. The Fund is riskier than the APP Balanced but has the potential to give you higher returns. The Fund can invest across all asset classes and adopts a moderate risk approach.
