

FTF Franklin Sterling Corporate Bond Fund W (acc)

Corporate Credit GB00BYZCTS97 Factsheet as of 29 February 2024

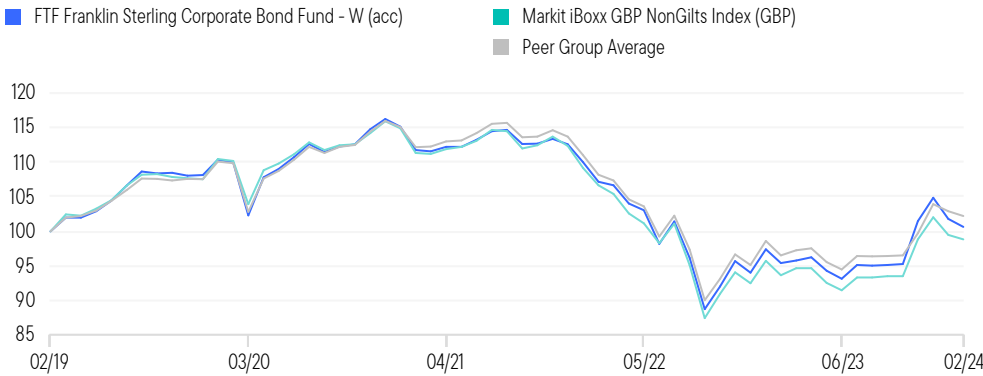

This is a marketing communication.

Investment Overview

The Fund aims to outperform the Markit iBoxx GBP Non-Gilts Index after fees and costs through a combination of income and investment growth over a three to five-year period. There is no guarantee that the Fund will achieve its objective over this or any other time period. Capital invested is at risk and you may get back less than you paid in.

Past performance does not predict future returns.

Charges

Maximum Initial Charge	0.00%
Exit Charge	—
Ongoing Charges Figure	0.44%
Performance Fee	—

The **Ongoing Charges Figure** (OCF) is an amount representing all operating charges and expenses of the Fund in the prior 12 months as a percentage of the Fund's average net assets for the period. Where that figure would not be a fair representation of future costs or if 12 months data is not available, an estimated figure will be shown.

Portfolio Data Information

Exposure: Notional exposure figures are estimated and are intended to show the portfolio's direct exposure to securities and indirect exposure, through derivatives. Direct and indirect exposures are subject to change over time and methodologies for calculating indirect exposures vary by derivative type. Portfolio breakdown percentages may not total 100% and may be negative due to rounding, use of derivatives, unsettled trades or other factors.

Credit Quality is a measure of a bond issuer's ability to repay interest and principal in a timely manner. The credit ratings shown are based on each portfolio security's rating as provided by Standard and Poor's, Moody's Investors Service and/or Fitch Ratings, Ltd. and typically range from AAA (highest) to D (lowest), or an equivalent and/or similar rating. For this purpose, the manager assigns each security the middle rating from these three agencies. When only two agencies provide ratings, the lower of the two ratings will be assigned. When only one agency assigns a rating, that rating will be used. Foreign government bonds without a specific rating are assigned a country rating, if available. Securities that are unrated by all three agencies are reflected as such. The credit quality of the investments in the Fund's portfolio does not apply to the stability or safety of the Fund. These ratings are updated monthly and may change over time. **Please note, the Fund itself has not been rated by an independent rating agency.**

What are the Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. There is no guarantee that the Fund will meet its objective. The Fund invests mainly in higher-quality debt securities of corporations located in or doing significant business in the UK. Such securities have historically proven to present some stability over time and have benefited from a limited exposure to interest rates and movements in the bond market. As a result, the performance of the Fund can fluctuate over time. Risks materially relevant not adequately captured by the indicator: **Credit risk:** the risk of loss arising from default that may occur if an issuer fails to make principal or interest payments when due. This risk is higher if the Fund holds low-rated, sub-investment-grade securities. **Derivative Instruments risk:** the risk of loss in an instrument where a small change in the value of the underlying investment may have a larger impact on the value of such instrument. Derivatives may involve additional liquidity, credit and counterparty risks. **Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets. For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

Glossary

Target: The benchmark is defined in the objective as a target the Fund intends to meet or beat. **IA Sector Peer Group:** The ACD considers that the Investment Association (IA) Sectors provide an appropriate comparison for performance purposes given the fund's investment objective and policy. Please refer to the Prospectus for further information. Source for sector average (mean) performance: Copyright - © 2024 Morningstar, Inc. All Rights Reserved. The information contained herein: (1) is proprietary to Morningstar; (2) may not be copied or distributed; and (3) is not warranted to be accurate, complete or timely. Neither Morningstar nor its content providers are responsible for any damages or losses arising from any use of this information. For more information, visit www.morningstar.co.uk. **Average Credit Quality:** The average credit quality reflects the holdings of the underlying issues, based on the size of each holding and ratings assigned to each based on rating agency assessments of its creditworthiness. **Weighted Average Maturity:** An estimate of the number of years to maturity, taking the possibility of early payments into account, for the underlying holdings. **Effective Duration** is a duration calculation for bonds with embedded options. Effective duration takes into account that expected cash flows will fluctuate as interest rates change. Duration measures the sensitivity of price (the value of principal) of a fixed-income investment to a change in interest rates. The higher the duration number, the more sensitive a fixed-income investment will be to interest rate changes.

Important Information

© 2024 Franklin Templeton. All Rights Reserved. This document is intended to be of general interest only and does not constitute legal or tax advice nor is it an offer for shares or invitation to apply for shares of the sub-funds of Franklin Templeton Funds ("FTF"), a UK-domiciled OEIC ("the Fund"). Nothing in this document should be construed as investment advice. Subscriptions to shares of the Fund can only be made on the basis of the current prospectus, the supplementary information document ("SID"), the relevant Key Investor Information Document ("KIID"), accompanied by the latest available audited annual report and the latest semi-annual report if published thereafter. US Persons (as more fully defined in the latest Fund prospectus) are not eligible to invest in the Fund. Shares of the Fund are available for sale and distribution in the UK. An investment in the Fund entails risks which are described in the Fund's prospectus and the relevant KIID. **The value of shares in the Fund and any income received from them can go down as well as up, and investors may not get back the full amount invested. Past performance is not an indicator, not a guarantee, of future performance.** Where a fund invests in a specific sector or geographical area, the returns may be more volatile than a more diversified fund.
