

# abrdn Short Dated Sterling Corporate Bond Tracker Fund

B Accumulation GBP

31 July 2023

## Objective

To generate income and some growth over the long term (5 years or more) by tracking the return of the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index.

**Performance Target:** To match the return of the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index (before charges). The Performance Target is the level of performance that the management team hopes to achieve for the fund. There is however no certainty or promise that they will achieve the Performance Target. The ACD believes this is an appropriate target for the fund based on the investment policy of the fund and the constituents of the index.

## Portfolio Securities

- The fund will invest at least 90% in bonds that make up the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index.
- The fund will typically invest directly but may also invest indirectly when deemed appropriate in order to meet its objective.
- Indirect investment may be achieved via derivatives and exchange-traded funds.
- The fund will invest primarily in investment grade bonds, as defined by the index provider.
- The fund may also invest in gilts, other funds (including those managed by abrdn), money-market instruments, and cash.

## Risk and reward profile

Lower risk  
Typically lower rewards

Higher risk  
Typically higher rewards

This indicator reflects the volatility of the fund's share price over the last five years. See Key Investor Information Document (KIID) for details.

## Key risks

- The value of investments and the income from them can fall and investors may get back less than the amount invested
- The fund may not perform fully in line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- The fund invests in securities which are subject to the risk that the issuer may default on interest or capital payments.
- The fund price can go up or down daily for a variety of reasons including changes in interest rates, inflation expectations or the perceived credit quality of individual countries or securities.

Management process

- The fund uses passive management techniques (including indexation and sampling) to achieve the fund's objective. The management team use their discretion (specifically when using sampling techniques) in deciding which investments are to be included in the portfolio. The number of investments may vary.
- They anticipate that deviation from the performance of the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index ("tracking error") will be in the region of 0.0-0.5% per year. Factors likely to affect the ability of the fund to achieve this tracking error are transaction costs, small illiquid components, coupon reinvestment, fund expenses such as annual management charges, significant inflows/ outflows and the cash management.
- The tracking error may be affected if the times at which the fund and the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index are priced are different. The fund is valued at 12:00, but the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index is valued at market close and so therefore the tracking error of the fund at Valuation Point may appear to be higher than if the fund and the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index were priced at the same time.

- (e) The use of derivatives carries the risk of reduced liquidity, substantial loss and increased volatility in adverse market conditions, such as a failure amongst market participants. The use of derivatives may result in the fund being leveraged (where market exposure and thus the potential for loss by the fund exceeds the amount it has invested) and in these market conditions the effect of leverage will be to magnify losses.

Derivative usage

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund (often referred to as "Efficient Portfolio Management").
- Where derivatives are used, this would typically be to reduce tracking error by enabling the fund to match the maturity profile ("duration") of the Markit iBoxx Sterling Non-Gilts 1-5 years Total Return Index.
- Derivative usage in the fund otherwise is expected to be very limited. Benchmark DetailsThe Benchmark Index rebalances on a monthly basis. <sup>1</sup>The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Fund. It is made up of the Annual Management Charge (AMC) of 0.07% and other charges. It does not include any initial charges or the cost of buying and selling stocks for the Fund. The Ongoing Charges figure can help you compare the annual operating expenses of different funds.  
<sup>2</sup>The Historic Yield as at 30/06/2023 reflects distributions declared over the past twelve months as a percentage of the mid-market share price, as at the date shown. It does not include any preliminary charge and investors may be subject to tax on their distributions.  
<sup>3</sup>These are the maximum charges that we might take out of your money before it is invested. In some cases, the charges may be less and you should speak to your financial advisor about this.
