

# FTF Martin Currie UK Managers' Focus Fund W (acc)

Blend GB00B7MPWT49 Factsheet as of 31 March 2024

This is a marketing communication.

### Investment Overview

The Fund aims to grow in value by more than the FTSE All-Share Index, from a combination of income and investment growth over a three to five-year period after all fees and costs are deducted. There is no guarantee that the Fund will achieve its objective over this or any other time period. Capital invested is at risk and you may get back less than you paid in.

Past performance does not predict future returns.

What are the Risks?

The value of shares in the Fund and income received from it can go down as well as up and investors may not get back the full amount invested. Performance may also be affected by currency fluctuations. Currency fluctuations may affect the value of overseas investments. There is no guarantee that the Fund will meet its objective. The Fund invests mainly in a concentrated portfolio of equity securities of up to 50 small, medium and large UK companies. Such securities have historically been subject to price movements, particularly for the small to medium companies, due to company-specific factors or movements in the UK equity markets generally. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods. Risks materially relevant not adequately captured by the indicator: **Concentration risk:** the risk that arises when a fund invests in relatively few holdings, few sectors or a restricted geographic area. Performance may be more volatile than a fund with a greater number of securities. **Equity risk:** prices of equities may be affected by factors such as economic, political, market, and issuer-specific changes. Such changes may adversely affect the value of the equities regardless of company-specific performance. **Investment in smaller company shares:** The fund buys shares in smaller companies. It may be difficult to sell these shares, in which case the fund may not be able to minimise a loss on such shares. **Liquidity risk:** the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets. For a full discussion of all the risks applicable to this Fund, please refer to the "Risk Factors" section of the current prospectus of Franklin Templeton Funds.

Glossary

**Target:** The benchmark is defined in the objective as a target the Fund intends to meet or beat. **RSMR Rating Source:** Rayner Spencer Mills Research Limited ("RSMR"). RSMR does not and cannot provide advice to investors on the suitability or appropriateness of any funds or investments. **IA Sector Peer Group:** The ACD considers that the Investment Association (IA) Sectors provide an appropriate comparison for performance purposes given the fund's investment objective and policy.
