Fund Aim

Aims to provide income and capital growth Obtains exposure primarily to non-government bonds at least half of which will have a remaining maturity of at least 10 years. Investments may be made in relation to bonds issued in currencies other than the fund's denominated currency. Exposure to currencies may be hedged, for example with currency forward contracts. Can invest in relation to bonds issued by governments, companies and other bodies. The fund may make use of derivatives which are consistent with achieving the fund's objective. This may result in "leverage" by which we mean a level of exposure which could expose the fund to the potential of greater gains or losses than would otherwise be the case. The fund has discretion in its choices of investments within its objectives and policies.
