Fund Aim

The objective of the Fund is to achieve capital growth. The Fund will primarily invest in a diversified portfolio of shares (equities) issued by companies listed or traded in developed countries globally. The Fund may also invest up to 20% of its assets in shares issued by companies listed or traded in Emerging Market countries. The Fund may use derivatives (an instrument that derives its value from another underlying asset) for both investment purposes and in an attempt to reduce risk, reduce costs and to generate additional income. The Fund may take both long (to gain from future strength) and short (to gain from future weakness) positions using derivatives. The base currency of the Fund is U. S. Dollars. If the share class currency differs from this then its value may be affected by exchange rate movements. Hedged share classes attempt to reduce this effect but may also exclude the benefits of positive exchange rate movement. Shareholders may redeem shares on demand on any dealing day. A dealing day for this Fund is any business day for the New York Stock Exchange and for banks in either Dublin or London except 24 December. Income generated by the Fund is retained within the NAV (net asset value of the Fund) for accumulating classes and distributed from the NAV for distributing classes. The Fund is Suitable for investors seeking long-term capital growth. For further details of the investment objectives and policies please refer to the prospectus of the Fund.
