**Fund Aim**

The Fund aims to provide a return, from a combination of income and capital growth over the long term. Performance target: To outperform the Markit iBoxx GBP Non-Gilts all maturities Index by 1% per annum, before the deduction of charges, over any 5 year period. The Fund invests at least 80% of its assets in Sterling-denominated investment grade (equivalent to BBB rated or higher) corporate bonds. The investment manager may use derivatives (complex financial instruments), including total return swaps, with the aim of making investment gains in line with the Fund's objective, to reduce risk or to manage the Fund more efficiently. The Fund is actively managed with reference to the Markit iBoxx GBP Non-Gilts all maturities Index, which is broadly representative of the bonds in which it may invest, as this forms the basis of the Fund's performance target. The investment manager has discretion to choose investments for the Fund with weightings different to the index or not in the index. As an additional means of assessing the performance of the Fund, the IA Sterling Corporate Bond sector average, which is based on a peer group of broadly similar funds, may also provide a useful comparator.
