Fund Aim

The fund aims to provide capital growth in excess of the Tokyo Stock Exchange 1st Section (Gross Total Return) index (after fees have been deducted) over a 3 to 5 year period by investing in equities of Japanese companies. The fund is actively managed and invests at least 80% of its assets in equities of Japanese companies. Investments are made based on Japan's economic strengths, such as its manufacturing industry (in particular on those parts of it that are demonstrating an ability to exploit newly emerging technology) and on sectors benefiting from structural change in the economy. The fund may also invest directly or indirectly in other securities (including in other asset classes), countries, regions, industries or currencies, collective investment schemes (including Schroder funds), warrants and money market instruments, and hold cash. The fund may use derivatives with the aim of reducing risk or managing the fund more efficiently.
