### Fund Aim

The objective of the Fund is to track the capital performance of the UK equity market, as represented by the FTSE 250 ex. Investment Trust Index. The Fund will invest primarily in the equities that make up the constituents of the FTSE 250 ex. Investment Trust Index. Securities in the FTSE 250 ex. Investment Trust Index will be held with weightings generally proportionate to their company's market capitalisation. The Fund may also invest in other transferable securities, permitted deposits, money market instruments, cash, near cash and units in collective investment schemes. The Fund may hold derivatives for the purposes of efficient portfolio management. From time to time non index constituents may be held as a result of a corporate action or index changes and these holdings will be sold or transferred as soon as reasonably practical. The fund will invest almost entirely in company shares included in the Index. The fund's investments will closely match those that make up the Index. The Index consists of shares of medium sized companies listed on the UK stock market. The fund may use derivatives (contracts which have a value linked to the price of another asset) for the following purposes: • To help with efficient day to day management. • To reduce some of the risks of the market. The fund may also invest in other transferable securities, cash or cash like investments and other funds.
