

31 December 2023

This document is intended for use by individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used.

This fund aims to be a lower risk portfolio and holds different types of investments that will typically have less than 5 years to their maturity date, such as money market instruments and/or short term bonds (loans to a government or company).

The fund is suitable for customers looking for a relatively stable investment for short term periods, normally less than 5 years. It may also be appropriate for investments that are being withdrawn over a similar timeframe.

The fund's holdings are reviewed regularly and may change over time.

The fund price is not guaranteed by Standard Life and there could be circumstances where the fund price may fall. A fall might happen if, for example, there is a default by the institution where some of the money is held or where there is an adverse market movement in the value of one or more of the securities held due to, for instance, a credit event or where the anticipated repayment term of an asset is extended. A fall may also happen if fund income falls so low as to be less than the charges applied to the fund.

The value of investments within the fund can fall as well as rise and is not guaranteed - you may get back less than you pay in.

The fund may use derivatives for the purposes of efficient portfolio management, reduction of risk or to meet its investment objective if this is permitted and appropriate.

The sterling value of overseas assets held in the fund may rise and fall as a result of exchange rate fluctuations.

	3 Months (%)	1 Year (%)	3 Years (%)	5 Years (%)
Standard Life Short Term Income Pension Fund	2.2	4.6	0.4	1.6

Note(s): The information shown relates to the past. Past performance is not a guide to the future. The value of your investment can go down as well as up. For the relevant charges on your policy please refer to your policy documentation.

Where a fund holds overseas assets the Sterling value of these assets may rise and fall as a result of exchange rate fluctuations.

Definition(s): Volatility Rating - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments. Volatility ratings are calculated on a scale of 0-7.

Money Market - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.
