

This document is intended for use by individuals who are familiar with investment terminology. Please contact your financial adviser if you need an explanation of the terms used.

The Fund aims to provide long-term growth by investing in one or more actively managed global equity funds. The Fund invests predominantly in equity based funds both in the UK and overseas.

The Fund's holdings will typically invest in a portfolio of equities across various countries, economic sectors and industries. They may also invest a proportion of assets in emerging markets equities and in other equity related securities such as common stock, convertibles, warrants and units/shares of equity related investment funds

Where the Fund invests in more than one fund, the allocation between these funds may be re-balanced periodically.

The value of investments within the Fund can fall as well as rise and is not guaranteed – you may get back less than you put in. The Sterling value of overseas assets held in the Fund may rise and fall as a result of exchange rate fluctuations.

The Fund's underlying funds may utilise a wide range of advanced investment strategies including those using derivatives. Derivatives are financial instruments whose value comes from movement in other investments, such as equities and currencies. They may use derivatives for the purpose of efficient portfolio management, reduction of risk or to meet their respective investment objective (including taking short positions) where permitted and appropriate.

The Fund has been designed by the Trustee Directors who comprise the Defined Contribution Sub-committee (that represents the Centrica Pension Scheme, Centrica Pension Plan and Centrica Engineers Pension Schemes) in conjunction with their advisers specifically for the following scheme sections: Centrica Savings Plan, Centrica Savings Plan (2011 Section) and Centrica Engineers Savings Plan. The Trustee Directors and their advisers will continue to consult with Standard Life on the future make-up of the Fund, which may be changed from time to time by Standard Life following discussion with the Trustee Directors and their advisers.

	3 Months (%)	1 Year (%)	3 Years (%)	5 Years (%)
Active Global Equity Fund	8.8	19.1	27.5	61.6

Note(s): The information shown relates to the past. Past performance is not a guide to the future. The value of your investment can go down as well as up. For the relevant charges on your policy please refer to your policy documentation.

Where a fund holds overseas assets the Sterling value of these assets may rise and fall as a result of exchange rate fluctuations.

Definition(s): Volatility Rating - The volatility rating of a fund indicates how much the fund price might move compared to other funds. The higher the volatility rating, the less stable the fund price is likely to be. You can use this to help you decide how much risk you're comfortable taking with your investments. Volatility ratings are calculated on a scale of 0-7.

Money Market - may include bank and building society deposits, other money market instruments such as Certificates of Deposits (CDs), Floating Rate Notes (FRNs) including Asset Backed Securities (ABSs), Money Market Funds and allowances for tax, dividends and interest due if appropriate.
