† FE Crown Fund Ratings is a quantitative based ratings system founded on historical performance, volatility and consistency. Funds are ranked against a relative benchmark chosen by FE with the lowest-rated funds carrying a single crown, and the highest awarded five crowns. Funds without a three-year track record are not rated. However, in some cases a rating is applied to funds whose underlying fund carries a three-year track record. FE Crown Ratings are produced solely by FE and its accuracy or completeness cannot be guaranteed.

Fund objective

The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets and invest in a manner consistent with the principles of environmental, social and governance (ESG) investing. The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies incorporated or listed in the United Kingdom. The Fund's total assets will be invested in accordance with its ESG Policy as disclosed in the prospectus. For further details regarding the ESG characteristics please refer to the prospectus and the BlackRock website at www.blackrock.com/baselinescreens. The investment adviser (IA) may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). The Fund is actively managed, and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to the FTSE All-Share Index (the "Index") when constructing the Fund's portfolio, and also for risk management purposes to ensure that the active risk (i.e. degree of deviation from the Index) taken by the Fund remains appropriate given the Fund's investment objective and policy. The IA is not bound by the components or weighting of the Index when selecting investments. The IA may also use its discretion to invest in securities not included in the Index in order to take advantage of specific investment opportunities. However, the geographical scope of the investment objective and policy may have the effect of limiting the extent to which the portfolio holdings will deviate from the Index. The Index should be used by investors to compare the performance of the Fund. The price of equity securities fluctuates daily and may be influenced by factors affecting the performance of the individual companies issuing the equities, as well as by daily stock market movements, and broader economic and political developments which in turn may affect the value of your investment. The return on your investment in the Fund is directly related to the value of the underlying assets of the Fund, less costs (see "What are the costs?" below). The relationship between the return on your investment, how it is impacted and the period for which you hold your investment is considered below (see "How long should I hold it and can I take my money out early?"). The depositary of the Fund is The Bank of New York Mellon SA/NV, Luxembourg Branch. Further information about the Fund can be obtained from the latest annual report and half-yearly reports of the BlackRock Global Funds. These documents are available free of charge in English and certain other languages. These can be found, along with other (practical) information, including prices of units, on the BlackRock website at: www.blackrock.com or by calling the International Investor Servicing team on +352 46268 5111. Your shares will be non-distributing (i.e. dividend income will be included in their value). Your shares will be denominated in Sterling, the Fund's base currency. You can buy and sell your shares daily. The minimum initial investment for this share class is US\$5,000 or other currency equivalent.

Asset split (as at 31/03/2026)

UK Equities	99.1%
Money Market	0.9%

Please note that 'Asset Split' data may not always be an exact reflection of what the fund is invested in - it is provided only as an indication of the high level asset types the fund is invested in. For example, 'Cash' could indicate cash on deposit or short term money market instruments.

Regional split (as at 31/03/2026)

UK	96.2%
USA	3.0%
Money Market	0.9%
